

Xile Hu is professor of chemistry at the École Polytechnique Fédérale de Lausanne (EPFL) in Switzerland. He received a B.S. degree from Peking University (2000; advisor: Prof. Jianhua Lin) and a Ph.D. degree from the University of California, San Diego (2004; advisor: Prof. Karsten Meyer). After a postdoctoral study at the California Institute of Technology (advisor: Prof. Jonas Peters), he joined EPFL as a tenure-track assistant professor in 2007. He was promoted to associate professor in January 2013 and full professor in June 2016. His laboratory is developing catalysts made of Earth-abundant elements for chemical transformations that are pertinent to synthesis, energy, and sustainability. His research in electrochemistry focuses on electrocatalytic materials for solar fuels. He has published more than 100 papers, with about 10000 citations and an H-index of 52.
