INTERNATIONAL SOCIETY OF ELECTROCHEMISTRY

REPORT for the ISE Sponsored Event

**Fifth Regional Symposium on Electrochemistry - South East Europe (RSE-SEE5)**  
**7-11 June | RIU Pravets | Pravets, Bulgaria**

After four successful symposium meetings in Croatia, Serbia, Romania and Slovenia, the **5<sup>th</sup> Regional Symposium on Electrochemistry - South East Europe** (ISE Sponsored Event) was organized in Bulgaria in June 2015. For the first time the Scientific Committee was represented by members from 17 countries of the South East Europe region.

Following the already established traditions, RSE-SEE5 crossed regional borders, creating a common platform for scientists and experts from regional and international research and industrial institutions to share knowledge, ideas, and achievements, to create personal contacts, to carry fruitful discussions in a friendly environment on the latest scientific and technical developments in electrochemical science and technology. The organized technical exhibition brought together producers of electrochemical equipment with scientists and also a special “brokerage” session was dedicated to presentations aiming to initialize common projects.

There were more than 200 participants from 28 countries that presented: 6 plenary, 17 keynote, 54 oral presentations and 88 posters, including participation of 85 young scientists.

The organizers would like to acknowledge with gratitude the financial support of the International Society of Electrochemistry (Division 3) which ensured the participation of two young scientists (from Romania and Hungary). Both of them presented keynote lectures and were awarded with a grant covering their conference registration fees.
