

1st Regional Electrochemistry Meeting of South-East Asia (REMSEA)
National University of Singapore, Singapore, Aug 5-7, 2008
<http://www.remsea.nus.edu.sg>
Organizer: National University of Singapore

12th February 2009

Dear ISE Executive Council and Division Chairs, Officers,

We wish to thank the Executive Council and Divisions 1 and 3 for the very kind seed fund support of the 1st Regional Electrochemistry Meeting of South-East Asia (REMSEA) held here at the National University of Singapore, from Aug 5-7, 2008.

At REMSEA 2008, we have a total of 110 participants, for which 14 countries were represented by 2 or more delegates. Two-third of total participation were from Southeast Asian countries, including Singapore. We thank the ISE Office for helping publicized the event to the Society members. The 3 days of meeting received presentations and discussion on a broad range of electrochemistry topics including recent advances in sensors, biosensors, nanobiotechnology, fuel cells/batteries and scanning probe techniques. The scientific programme include plenary and keynote talks by Prof. Juan Feliu (Plenary Speaker, Universidad de Alicante), Prof. Hasuck Kim (Seoul National University), Prof. Eric Bakker (Curtin University of Technology), Prof. Yiping Wu (Fudan University), Prof. Guy Denault (University of Southampton) and Prof. Huangxian Ju (Nanjing University). A photo gallery has been set up at the REMSEA website, available to all participants as well as interested members of ISE.

Together with Profs. Orawon Chailapakul (Chulalongkorn University), Yook Heng Lee (Universiti Kebangsaan Malaysia) and Ivandini Tribidasari (University of Indonesia), we are looking forward to future REMSEA meetings, for which we sincerely look forward to continual support from ISE.

Yours sincerely,

Dr. Chee-Seng Toh

Chair, REMSEA 2008
