INTERNATIONAL SOCIETY OF ELECTROCHEMISTRY

**REPORT for the ISE Sponsored Event**  
**10th International Symposium on Electrochemical Impedance Spectroscopy**

In June 2014 the 10th International Symposium on Electrochemical Impedance Spectroscopy (ISE sponsored event) was organized in Bulgaria.

The purpose of EIA10 was to provide a common platform for scientists and experts from different countries to share knowledge and ideas on impedance data analysis, which is the crucial step in every electrochemical impedance spectroscopy investigation. The Symposium was enriched with two discussion sessions: (i) "Fuel Cells and Hydrogen Technologies: Bridging Experimental and Numerical Research – Development and optimization of Advanced Characterization Tools Based on Electrochemical Impedance Spectroscopy" and (ii) "Advancements in impedance Instrumentation: Recent progress and Advancing Requirements (Producers information and Users Vision)". There were 52 participants from 18 countries that presented: 7 plenary, 23 oral presentations and 10 posters (with 10 minutes oral presentation), including young scientists dedicated session with awards.

We wish to express our gratitude to the Scientific Committee for the expertise and professional support and all the participants for their eager interest and valuable scientific contributions.

The organizers would like to acknowledge with gratitude the financial support of the International Society of Electrochemistry and the Ministry of Education and Science (Program "Support of International Scientific Events organized in the Republic of Bulgaria") which ensured the participation of 7 young scientists.
