Report on the ECHEMS conference

In behalf of the organizers and participants of the conference ECHEMS-11 "Electrochemistry in renewable energy based on molecular mechanisms" I would like to thank you very much for your generous financial support of Divisions 1 and 6. In particular I would like to emphasize how important it was to receive your commitment in an very early stage of the organisation process. It is typically much easier to find sponsors for something that is already running great than finding somebody to take a risk in an early stage of the process. So please accept my very special thanks.

To my judgement and the feedback I have received the meeting was a full success both scientifically as well as from an organisational point of view. The meeting (15-18 June 2015, Bad Zwischenahn, Germany) had 91 participants, 45 of them had finished a PhD. The origin of the participants was as following: Germany 32; France 13, UK 8, Poland 7, Denmark 7, Mexico 4, China 4, Switzerland 2, Singapore 2, Turkey 2, Italy 2, Australia 1, Netherlands 1, Belgium 1, Japan 1.

There was a total of 5 plenary lectures (45 min inkl. discussion), 34 contributed talks (20 min incl. discussion) and 39 poster. The quality of the contributed papers was very high and the scientific committee was forced to accept a number of promising abstracts as posters instead of talks. For your information I attach a complete schedule as well as the book of abstracts.

Some photographs of the meeting you may find under
