

Report on Division 6 activity in 2007

As usually the division participated in organization of Meetings which took place in 2007 or are going to take place in 2008. O. Hammerich and M. Opallo as members of Organizing Committee participate in organization of ISE 5th Spring Meeting in Dublin. Our main duty was evaluation of submitted abstract and suggesting the appropriate session or whether the submitted paper has to be presented as a poster or oral presentation. Our division welcomed better visibility of molecular electrochemistry during ISE Meeting B. Speiser and O. Hammerich coorganized Electrochemical Material Science and Molecular Electrochemistry Symposium of 58th ISE Meeting in Banff (co-organisers). O. Hammerich as coordinator and J. Ludvik and M. Opallo participate in organization of Symposium: Molecular Electrochemistry: From Single Molecules to Conducting Polymers of 59th ISE Meeting in Seville.

This year our division sponsored only one meeting - 3rd ECHEMS Meeting in Trest (Czech Republic) (500 Euro). We considered only one application as too little and members of Division were encouraged to find more applicants for next year.

This year we Introduced of Young Researcher Award for the Best Poster in Molecular Electrochemistry presented at Annual Meeting of the ISE and we want to continue this tradition during next meetings This prize was awarded to two participants of the 58th ISE Meeting in Banff, Canada, September 2007. The posters were elected by V-ce chairs of the Division 6 with help of all Division Officers. Two prizes (500 Euro to cover partly participation costs + one year ISE membership) were awarded to Jana Bulickova (Czech Republic) and Vasile Coman (Sweden). It is important to say that we looked at all posters not only there presented at Symposium organized by our Division.

The members of the Division 6 also met at luncheon Meeting 13th September 2007 in Banff to discuss Division Activity.

Marcin Opallo
