

Kosuke Ino is an assistant professor in Graduate School of Environmental Studies, Tohoku University. His work focuses on electrochemical devices based on micro/nanochemistry for bioanalysis. Before joining the group of Prof. Tomokazu Matsue in Tohoku University in April 2008, he received his PhD degree in engineering from Nagoya University in 2008. He received Research Fellow of the Japan Society for the Promotion of Science (2006–2008). His PhD thesis, supervised by Prof. Hiroyuki Honda, focused on tissue engineering using magnetite nanoparticles and magnetic force. He received his master's and bachelor's degrees from Nagoya University in 2006 and 2004, respectively. His research focused on tissue engineering using magnetite nanoparticles and magnetic force.
