

Lu-Yin Lin received her BS degree in the Department of Chemical Engineering of National Taiwan University, Taiwan, in 2008, and achieved her Ph.D. degree in the same department under the supervision of Prof. Kuo-Chuan Ho in 2012.

Her primary research interests are dye-sensitized solar cells, electrochemical analysis/systems, as well as energy conversion and storage materials/systems.

She had her postdoctoral fellowship in the Department of Chemistry, University of California, Berkeley in 2013 under the supervision of Prof. Peidong Yang to study the artificial photosynthesis.

She began her assistant professor career in the Department of Chemical Engineering and Biotechnology, National Taipei University of Technology in August, 2014, to study the nanomaterial synthesis of metal oxides/sulfides and carbon materials, as well as the electrochemical applications of supercapacitor and artificial synthesis.
