

Candidate Statement

Chair of Division 2 – Bioelectrochemistry

Dear colleagues,

It is a great honor to be nominated as a candidate for Chair of Division 2. I am pleased to present the following candidate statement for the 2026 elections for Division Officers of the International Society of Electrochemistry (ISE):

I deeply value the impact that the ISE community has on the progress of electrochemical science through international scientific collaboration and mentoring of new generations. I have been a member of the ISE for over 10 years, and for the past two years, I have served as vice-Chair of Division 2, with a commitment to work and collaborate on the activities of our Division. During this time, I have witnessed the importance of our division in supporting research in bioelectrochemistry by organizing division-sponsored symposia during the Annual and Topical meetings of the ISE, supporting the organization of conferences dealing with topics related to bioelectrochemistry, and recognizing scientific achievements through specific awards given to researchers working within the scope of Division 2.

If elected, I hope to help sustain these important activities and further promote the development of Division 2, so that it remains a strong and well-regarded community. In particular, I intend to reinforce the importance and recognition of the Division among the young scientific groups, as well as to commit to supporting a greater number of meetings and activities in the field of bioelectrochemistry in the future.

Felipe Conzuelo
