

Rebeca Marcilla

Candidate for Vice Chair | ISE Division 3 | Electrochemical Energy Conversion and Storage

Candidate Statement

I am pleased to present my candidacy for Vice-Chair of ISE Division 3. My experience as a researcher, group leader and current Division 3 Vice-Chair has reinforced my commitment to the ISE as an international forum for scientific exchange and professional development. My vision for the Division is: Advancing excellent science through an open, connected community — developing early-career talent, recognizing women's leadership, and engaging researchers worldwide.

If elected, I will work with the Division officers and members to develop timely and scientifically ambitious symposia, strengthen collaboration across ISE Divisions and improve the visibility of our community. I will support opportunities for early-career researchers and encourage broader geographical and disciplinary participation in Division activities. Having led an international research unit and coordinated scientific activities involving academia and industry, I bring scientific breadth and practical organizational experience. I would be honoured to continue serving Division 3 and helping it represent the full scope of electrochemical energy conversion and storage.
