

Report on ISE sponsored conference 10th Regional Symposium on Electrochemistry - South-East Europe (RSE-SEE10)

prepared by

Magdaléna Hromadová (on behalf of the Local Organizing Committee)

Heyrovský Institute of the Czech Academy of Sciences,

Dolejškova 3, 182 00 Prague 8, Czech Republic,

E-mail: magdalena.hromadova@heu.cas.cz

Local Organizing Committee: Jiří Ludvík, Magdaléna Hromadová, Romana Sokolová, Viliam Kolivoška (Heyrovský Institute, all active ISE members).

RSE-SEE10 conference took place in Hotel Krystal, Prague, Czech Republic in the period September 20-24, 2026. This conference is a flagship of the Association of South-East European Electrochemists (ASEEE), which is a unique regional voluntary framework bringing together scientists involved in fundamental and applied electrochemistry. The conference serves as an ultimate platform to meet other electrochemists within the region and beyond.

Regional Symposium on Electrochemistry – South East Europe is organized every 2 years and was hosted this year by the Czech Republic. The Organizing and Scientific Committees of the ASEEE association are listed on the www site of the conference <https://www.aseee.eu/index.php>. RSE-SEE10 conference was open to any electrochemist from all over the world. This year in total **91 participants** with a scientific contribution presented their work including **4 plenary** lectures (Olivier Buriez, France; Ismael Díez-Pérez, United Kingdom; Rafał Jurczakowski, Poland; Francesco Paolucci, Italy), **8 keynote** lectures and **38 oral presentations**. The participants were from **24 countries** (in alphabetical order Albania, Austria, Belgium, Bulgaria, Croatia, Czech Republic, France, Germany, Hungary, India, Italy, Lithuania, Mexico, Peru, Poland, Romania, Saudi Arabia, Serbia, Slovakia, Slovenia, Thailand, Ukraine, United Kingdom and U.S.A.), see the Scientific Program and Book of Abstracts (printed version 122 pages, ISBN: 978-80-87351-73-4) available on the www site of the ASEEE association.

The largest group of scientists was from Bulgaria with an active participation of the President of the Bulgarian Academy of Sciences Prof. Evelina Slavcheva, who delivered a keynote lecture. Bulgaria was also confirmed as the country, which will host the next RSE-SEE11 meeting in 2028.

RSE-SEE10 was sponsored by the ISE executive committee and Heyrovský Institute. Several companies that produce electrochemical instrumentation exhibited their portfolio; namely, Gamry Instruments, PalmSens, Metrohm Czech Republic and Equilibrium.

The opening of the conference included also the presentation of the ISE society and its involvement in the support of RSE-SEE10, presented by Assoc. Prof. Hromadová in the capacity of the past Division 6 Chair and past ISE Regional Representative of the Czech Republic). The importance, activities and events co-organized by ISE have been highlighted. ISE logos have been

placed visibly on the front part of the auditorium desk and on the other visible places within and outside of the auditorium throughout the conference. All conference documents (announcements, program, book of abstracts, see <https://www.aseee.eu/index.php>) included the ISE logo.

The support enabled the award of one **Best Student Oral Presentation Prize** (Wenzhu Kuang, UK) and three **Best Poster Prizes** (Chaima Sakouhi, France; Marek Beneš, Czech Republic; Arya Kannathvalappil, India), which have been selected by the Evaluation Committee of the participating senior scientists from different countries.

Selected conference contributions are expected to be published in a Special Issue of the Journal of Electrochemical Science and Engineering <https://pub.iapchem.org/ojs/index.php/JESE>.

On behalf of the Local Organizing Committee, we sincerely thank the International Society of Electrochemistry (ISE) for its generous support, which was instrumental for the success of this event.

Prague, 9 October, 2026

Magdaléna Hromadová
