

Candidate's statement

International Society of Electrochemistry was founded in 1949 by leading European and American Electrochemists to serve the growing needs of electrochemistry in becoming a modern scientific discipline. Since then the association has evolved and now comprises about 3000 individual members and more than 20 Corporate Members and Corporate Sustaining Members (industrial and commercial organizations). Its membership comes from more than 70 countries and is organized in over 40 regional sections from all five continents. ISE is, therefore, a world-wide non-profit-making organization, whose activities rely on an efficient and transparent management of its financial resources.

Serving as Treasurer for ISE within the Executive Board would be a great honour for me and, if elected, my efforts will be focused on:

- maintaining transparency on the financial aspects of the society and ensure the financial sustainability of ongoing ISE activities;
- ensuring efficient use of the ISE financial resources for the benefit of the spread of electrochemistry and the membership increase promoting maximum inclusiveness;
- maintaining low memberships and reasonable meeting fees.
