
Sponsored by the University of Yamanashi
Supported by the New Energy and Industrial Technology Development Organization (NEDO), the International Society of Electrochemistry (ISE), The Electrochemical Society of Japan (ECSJ), The Chemical Society of Japan (CSJ), The Society of Polymer Science, Japan (SPSJ), the Catalysis Society of Japan (CATSJ), the Ministry of Economy, Trade and Industry (METI), Yamanashi Prefecture, the Japan Science and Technology Agency (JST), the National Institute for Materials Science (NIMS), The Research Association of Hydrogen Supply/Utilization Technology (HySUT), the Japan Automobile Research Institute (JARI), the Fuel Cell Commercialization Conference of Japan (FCCJ), the Fuel Cell Development Information Center (FCDIC), and the Yamanashi Academy of Sciences.

The International Fuel Cell Workshop 2018 (IFCW2015) has been held on the 23rd and 24th of August. This is the 8th workshop since the first IFCW was held in 1989, the 2nd in 1998, the 3rd in 2001, the 4th in 2005, the 5th in 2009, 6th in 2012, and 7th in 2015. The aim of all of these workshops has been unchanged. We have intended to contribute to the progress in the research and development (R & D) of fuel cells by both the exchange of the hottest information and the forthright discussion among researchers and engineers from widely diverse fields.

In IFCW2018, we have focused on issues from basic science to applications of PEFCs with proton-exchange-membranes, together with anion-exchange-membranes, which will be important for next-generation systems without noble metal electrocatalysts. Eleven world-leading speakers were invited from academia, research institutes, and industry: K. Sasaki (Brookhaven National Laboratory, USA), M. Ishida (Tanaka Kikinzoku Kogyo, Japan), P. N. Pintauro (Vanderbilt Univ., USA), A. Iiyama (Univ. Yamanashi, Japan), S. Holdcroft (Simon Fraser Univ., Canada), A. Watakabe (Asahi Glass Co. Ltd, Japan), W. Gu (General Motors, USA), T. Suzuki (Toyota Motors, Japan), Y. Tsuji (Panasonic, Japan), A. R. Kucernak (Imperial College London, UK), A. Ishihara (Yokohama National Univ., Japan).

The number of the attendees was about 140 from 12 countries in the world. The workshop was carefully organized so as to maintain sufficient time for the presentation and the discussion. We had also 34 contributed poster presentations, which promoted further discussion among the attendees. With a peer review by the invited speakers and organizers, the “ISE Poster Award (with the use of ISE logo)” was presented to 4 students with the gifts. One of the division officers (H. U.) clearly announced that the ISE is the sponsor of the prize and the students are encouraged to join the member of the ISE.

All attendees thoroughly enjoyed the workshop and FC-related exhibitions. The workshop has certainly contributed to the wider and earlier introduction of fuel cells as part of the coming hydrogen society.

Hiroyuki Uchida, Workshop Chairman
Co-organizers : Hubert Gasteiger, Anthony Kucernak, Hasuck Kim, Steven Holdcroft
